## DIRECTIONS FOR USE

Wear safety goggles to protect from possible eruption of lye. Remove standing water. Pour drain opener slowly, directly into drain.

### ◆ Bathroom sinks, tubs & showers:

1. Remove as much standing water as possible from sink or tub. Make sure water in drain is cool. Remove strainer if possible.
2. Slowly pour 1 heaping tablespoon of Crystal Lye Drain Opener directly into drain. Do not allow direct contact of product to any sink or tub surface or fixture. Damage may occur.
3. Add 1 cup of cold water to drain. Immediately cover drain opening with a bowl to avoid splash back. Do not completely seal, as pressure can build up.
4. For best results, leave in drain for 15-30 minutes.
5. Once drain has cleared, flush with cold water.
6. If drain remains clogged, repeat steps 1-5. Avoid physical contact with standing water in sink from the first application, as burns may occur.
7. If after two treatments the drain remains clogged, consult a plumber and mention the use of Instant Power Crystal Lye Drain Opener.
