

A/C Condensate Drain Line Maintainer

The air conditioner's drain line is an oasis for all sorts of unwelcome guests, such as mold, mildew, algae, and even small plants. As the condensation collects in the A/C line, so does a buildup of sludge and debris. Over time this can cause a blockage which leads to water backing up into the A/C drain pan - not something you want in your facility nor the costly repairs! Maintain your A/C system to prevent high humidity indoors, unpleasant odors and water damage.

FEATURES

- ◆ Maintains A/C Drain Lines from the outside
- ◆ Prevent water damage to ceilings, walls and floors
- ◆ Compatible with residential and commercial A/C systems

APPLICATIONS

- ◆ Hotels/Motels
- ◆ Apartment Complexes
- ◆ Convenience Stores
- ◆ Restaurants
- ◆ Hospitals/Nursing Homes
- ◆ Industrial/Manufacturing Facilities
- ◆ Educational Facilities
- ◆ Government Facilities

DIRECTIONS

- ◆ Shake well before use. Pour 8 ounces into A/C condensate drain line. Do not flush with water.
- ◆ **Frequency:**
Use once or twice a month when you change air filters, or as needed. This will keep condensate line clogs and odors away while keeping your facility safe from annoying water leaks.
- ◆ **Note:**
Completely clogged drain lines must be cleared prior to use.
